

# Audubon International Green Cert. | AMELIA ISLAND

The Green Lodging & Hospitality Program is a voluntary, non-regulatory effort by Audubon International that encourages the tourism industry to:

- Conserve water and energy
- Minimize waste generation and increase recycling
- Improve indoor air quality
- Implement environmentally friendly purchasing and pollution prevention strategies

Benefits to your business include:

- Easy identification as a 'green facility' for millions of 'green' travelers.
- Structure, information, tools, and advice to reduce operating costs.
- Third-party, credible verification by a non-profit environmental group.

The AICVB takes supporting the environment seriously and is willing to pay the majority of the costs for your business to obtain a three-year green certification.

Options	Partner Cost	Value
Lodging	FREE	\$250-750
